

THIKASH J

(AI/ML – CSE Student)

Aspiring Computer Science and Engineering student specializing in Artificial Intelligence and Machine Learning, with a strong foundation in programming, data structures, and modern AI technologies. Passionate about building real-world solutions through innovative projects and continuous learning. Seeking opportunities to apply technical skills, contribute to impactful developments, and grow within the evolving technology industry.

WORK EXPERIENCE

Infosys Springboard Internship 6.0 FEB 2026 – APR 2026

Full Stack Java Developer Intern

- Completed a full-stack development internship focused on Java, Spring Boot, and MySQL application development.
- Strengthened expertise in secure web application development, database design, and role-based authentication through project implementation.

Durga Tech Research & Development DEC 2025 – JAN 2026

Java Intern

- Completed internship training focused on Core Java programming and application development.
- Strengthened understanding of object-oriented programming concepts and coding practices.

CERTIFICATE

- Java Foundation Certification - Infosys Springboard
- Introduction to IoT and Digital Transformation-NASSCOM
- Claude Code 101
- Prompt Engineering-skillup
- GenerativeAI Fluency-Nasscom

PUBLISHED JOURNALS

1. AI-driven adaptive deception and threat intelligence
 - ISSN-1879-1719 - Article Id:JETM/9431

PROJECTS

ResolveIT - Smart Grievance & Feedback Management System

- Developed a full-stack grievance and feedback management system using Java, Spring Boot, and MySQL. Built secure role-based dashboards with complaint tracking, status management, and feedback features for streamlined issue resolution.

AgriSense - AI-Based Agriculture Support Platform

- Built an AI-powered web application providing smart farming insights using modern web technologies and AI APIs. Developed interactive frontend features and integrated AI-based recommendations for agriculture support.

Health Hive - AI Healthcare Chatbot

- Developed a Python-based AI chatbot for healthcare assistance and automated responses. Designed conversational logic to simulate an AI health assistant and improve user interaction.
